

Streamline Operations Between ShipHero & Your Other Applications with Pipe17

Pipe17 is now directly integrated with ShipHero. This added functionality will let clients seamlessly connect ShipHero to a growing range of eCommerce applications.

As a **fully integrated** option with ShipHero, Pipe17 enables seamless integration with more than 75 different eCommerce applications to ShipHero. These integrations cover the spectrum of necessary and crucial aspects of running an eCommerce business, including financials, ERPs, points of sale, returns management and more.

A Solution for MultiChannel Fulfillment

Pipe17's strength lies in making it easy for eCommerce businesses to connect ShipHero to the platforms and tools they need to incorporate ShipHero into their multi-channel solution.

Multichannel, or omnichannel, selling is a key aspect of eCommerce and Pipe17 offers Fulfillment clients the ability to better manage their order fulfillment lifecycle. Ingest orders from any source and set specific rules for how and where they get fulfilled. Clients can then send orders to ShipHero or route them to a dropship provider, a retail store or your own warehouse based on SKU, availability, location and more.

Pipe17's Integrations
